

SUMMARY OF “MAJOR” FORMULARY CHANGES FOR 2017

- Erectile dysfunction drugs Viagra and Cialis are now excluded from coverage for treatment of ED. (Note – they may still be approved for treatment of certain cardiovascular conditions.)
- Adrenal Medications (for long-term treatment of asthma): Flovent moving from excluded to preferred. Asmanex, Dulera, Qvar now excluded.
- Insulins (for treatment of diabetes): Humulin, Humalog moving to preferred.
- Selective Beta-2 Agonists (for treatment of COPD and other long-term breathing problems): Advair moving from excluded to preferred.
- Devices: Accu-Chek blood glucose products now excluded. One Touch products are the only preferred products.
- Diabetes: all brands of meters, strips, lancets are excluded with exception of One Touch products.

The above list does not include all changes to Common Ground Healthcare Cooperative’s 2017 formulary. The formulary may change on a quarterly basis. To view the most recent version, please visit www.commongroundhealthcare.org/members/prescription-coverage.

Access to this information does not guarantee any coverage details or benefits available; it only provides access to view the full list of medications that are available through Common Ground Healthcare Cooperative’s Prescription Drug Formulary. For a complete outline of covered benefits and details on medication coverage, please refer to your policy and the Schedule of Benefits provided in your enrollment packet. Some medications listed on the Prescription Drug Formulary may not be covered under your specific benefit. Where differences are noted, the benefit plan documents will govern. We reserve the right to add or remove prescription drugs from the formulary as deemed necessary. If you have questions regarding your prescription drug coverage, please call Member Services at 877-514-2442.
