

## 2021 American Rescue Plan Income Eligibility for Tax Credits

Please use this new Federal Poverty Level Income chart to determine your eligibility for tax credits. The American Rescue Plan column represents the maximum percentage of your income to spend on health insurance premium.

*Example 1: If your household makes \$80,000 annually, you can multiply this income by 0.085 (8.5%) to determine your maximum annual premium.*

\$80,000 x 0.085 = \$6,800. This means that \$6,800 is your maximum annual premium. Any premium costs over this amount would be eligible for tax credits under the American Rescue Plan.

*Example 2: If your household makes \$55,000 annually, you can multiply this income by 0.085 (8.5%) to determine your maximum annual premium.*

\$55,000 x 0.085 = \$4,675. This means that \$4,675 is your maximum annual premium. Any premium costs over this amount would be eligible for tax credits under the American Rescue Plan.

Income (% of Federal Poverty Level)	Income for Single Household	American Rescue Plan Required Contribution as Share of Income
Under 138%	\$0 to \$17,609	0.0%
139% - 150%	\$17,609 to \$19,140	0.0%
151% - 200%	\$19,140 to \$25,520	0.0% - 2.0%
201% - 250%	\$25,520 to \$31,900	2.0% - 4.0%
251% - 300%	\$31,900 to \$38,280	4.0% - 6.0%
301% - 400%	\$38,280 to \$51,040	6.0% - 8.5%
Over 401%	\$51,040 and up	8.5% of income
